EMFACE®

EMFACE
AESTHETIC

**YOUR FACE,
LIFTED.
NO NEEDLES.
NO DOWNTIME.**

EMface is the world's first non-invasive treatment to target facial ageing all the way down to the muscle level – combining advanced radiofrequency with next-generation muscle stimulation for real, visible results.

HOW IT WORKS

As we age, we lose volume, skin laxity increases and the muscles that give our face its structure begin to weaken.

EMface addresses all of this simultaneously.

Using synchronised radiofrequency and High-Intensity Facial Electrical Stimulation (HIFES), it stimulates collagen and elastin deep within the skin while selectively activating the facial elevator muscles – the muscles responsible for the natural lifted appearance of a youthful face.

The result is tighter skin, better-defined contours and a genuine lifting effect, all without a single needle or moment of recovery time.

WHAT TO EXPECT

20-MINUTE SESSIONS

Lie back and relax – no prep, no pain, no downtime

NON-INVASIVE

No needles, no Botox, no surgery, no recovery time

PROGRESSIVE RESULTS

Collagen builds over weeks – results continue to improve

ALL SKIN TYPES

Safe and effective across a broad range of skin types and tones

YOUR TREATMENT PROGRAMME

Most clients achieve optimal results with a course of 4-6 sessions, each lasting just 20 minutes.

Sessions are typically spaced one week apart, and results continue to build in the weeks following your final treatment as collagen and elastin production progresses.

Our Clinical Nurse Specialist will design a personalised programme based on your individual needs and goals.

WHAT IT TREATS

- Skin laxity & loss of firmness
- Volume loss associated with ageing
- Fine lines & wrinkles
- Loss of facial definition & contour
- A tired or flat appearance
- Weakening of the cheek & brow-lift muscles

IS EMFACE RIGHT FOR YOU?

EMFACE AESTHETIC

EMface is suitable for most adults looking to address signs of facial ageing without surgery or injectables. However, it is not suitable for everyone.

Our Clinical Nurse Specialist will carry out a full assessment at your consultation to confirm suitability before any treatment begins.
